Councillor Fletcher
Ward 30 – Toronto-Danforth
Toronto City Hall
100 Queen Street West
Toronto, Ontario M5H 2N2

Dear Councillor Fletcher,

I am writing in follow-up to my April 7, 2016, letter to provide you with an update on progress regarding the Ship Channel Bridge.

I am pleased to share that the scheduled critical repairs on the Ship Channel Bridge have been completed, allowing two-way traffic to resume later today, May 19, 2016. We are particularly pleased that the bridge will be fully functional for the long weekend and leading into the busy summer season.

However, based on a report provided to us in late March by the bridge engineers, we believe that additional work will be required in the fall to reinforce the structure beneath the bridge. At that time, it is expected the Ship Channel Bridge will return to one-way traffic until the work is completed.

I will, of course, keep you updated as timelines and next steps are determined. Should you have questions, please do not hesitate to contact me.

Sincerely,

Geoffrey A. Wilson
Chief Executive Officer
