

Billy Bishop Toronto City Airport Terminal Upgrade Project

Community Liaison Committee
January 2017

NIEUPORT AVIATION
INFRASTRUCTURE PARTNERS

Agenda

- **Recap on rationale for this Upgrade**
- **Recap on project guiding principles and layouts**
- **Construction mitigation plans**
- **Construction activity underway**
- **Upcoming construction activities**
- **Community Outreach**

Rationale for this Upgrade

Enhanced Passenger Experience

- Refurbishment of lounges to reflect changing passenger needs
- Increased processing capacity
- Additional food and beverage (F&B) and retail offerings

Increased Operational Efficiencies

- Undertake enabling works for U.S. Preclearance Facility
- Additional office space for Airport Stakeholders

Ability to respond to irregular operations

- Weather delays
- Peak travel periods

Project Guiding Principles

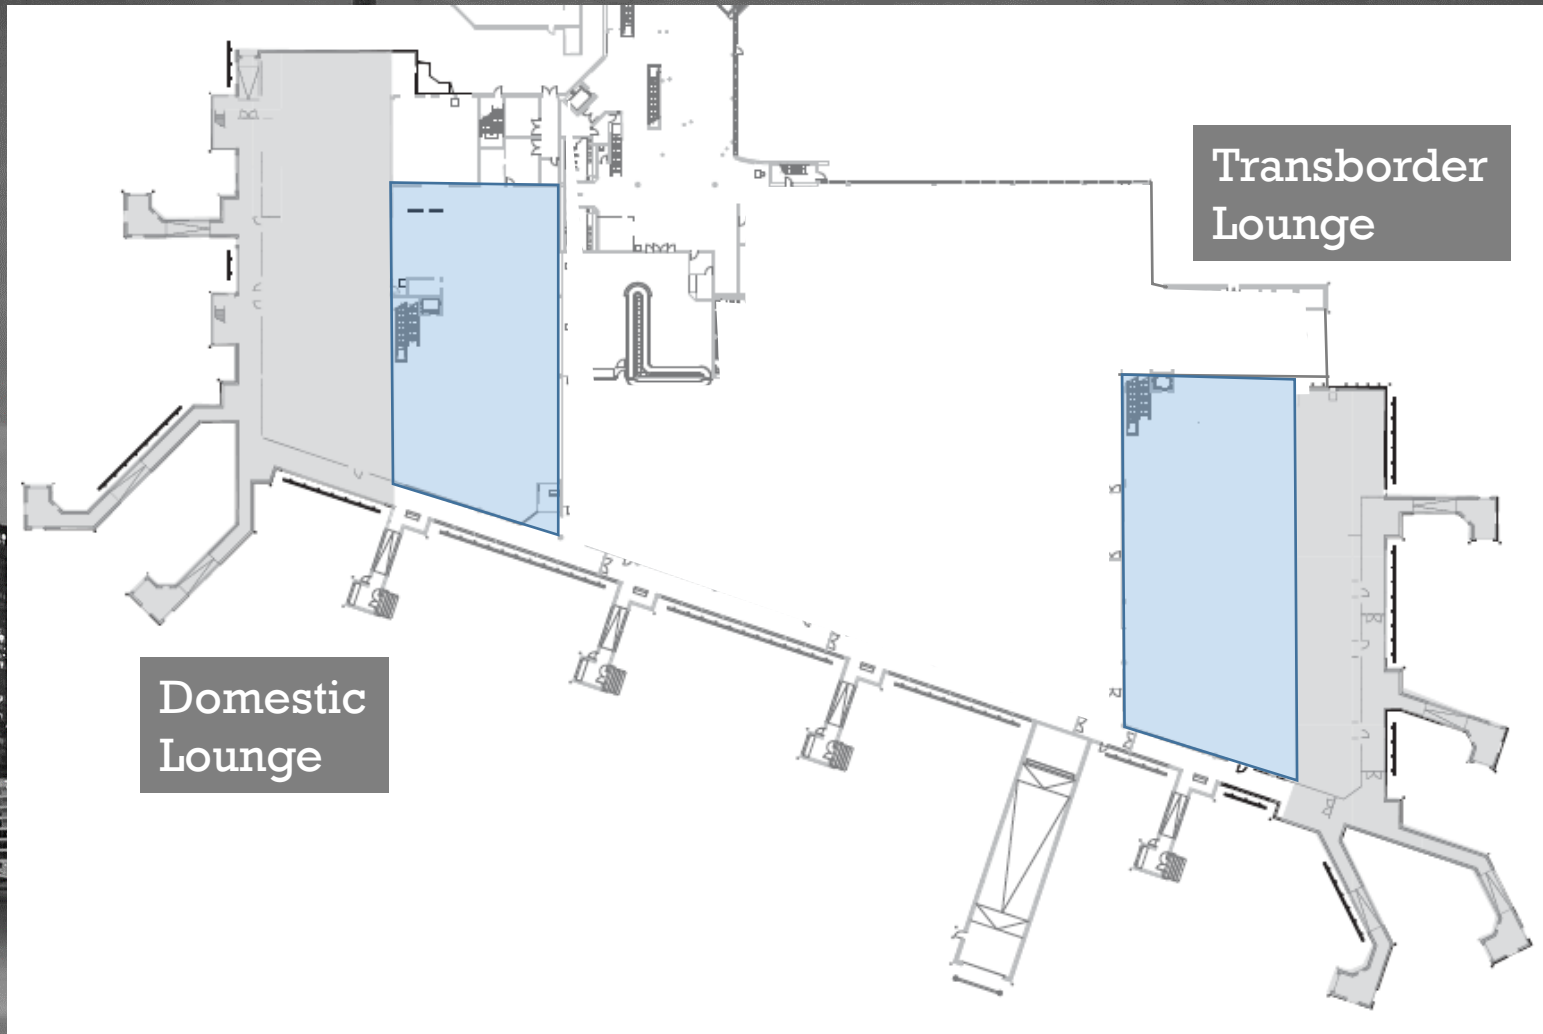

- **Maintain the safety and security** of the aerodrome and terminal for the passengers, aircraft, employees, area residents and construction workers.
- **Minimize operational impacts** through proactive, timely and regular planning and communication with operational stakeholders.
- **Minimize customer impact** through proactive planning and communication such that customer experience remains of a consistent high quality.
- **Mitigate local community concerns** based on implementing best practices for noise and construction related items.

Administration

Construction Mitigation Measures

- Lighting for external work areas will be directed away from the community/mainland;
- Truck and equipment deliveries will be minimized during school start and end times;
- Overnight operations seek to reduce vehicle movement to minimize back up beeper;
- PortsToronto's seasonal barge operation will be used when completing pavement work where possible

Current Work Area - Aerial

Current Work Area - Photos

Gate 8 Demolition

Module Temporary Gate 8A and 8B Installation

Current Work Area - Photos

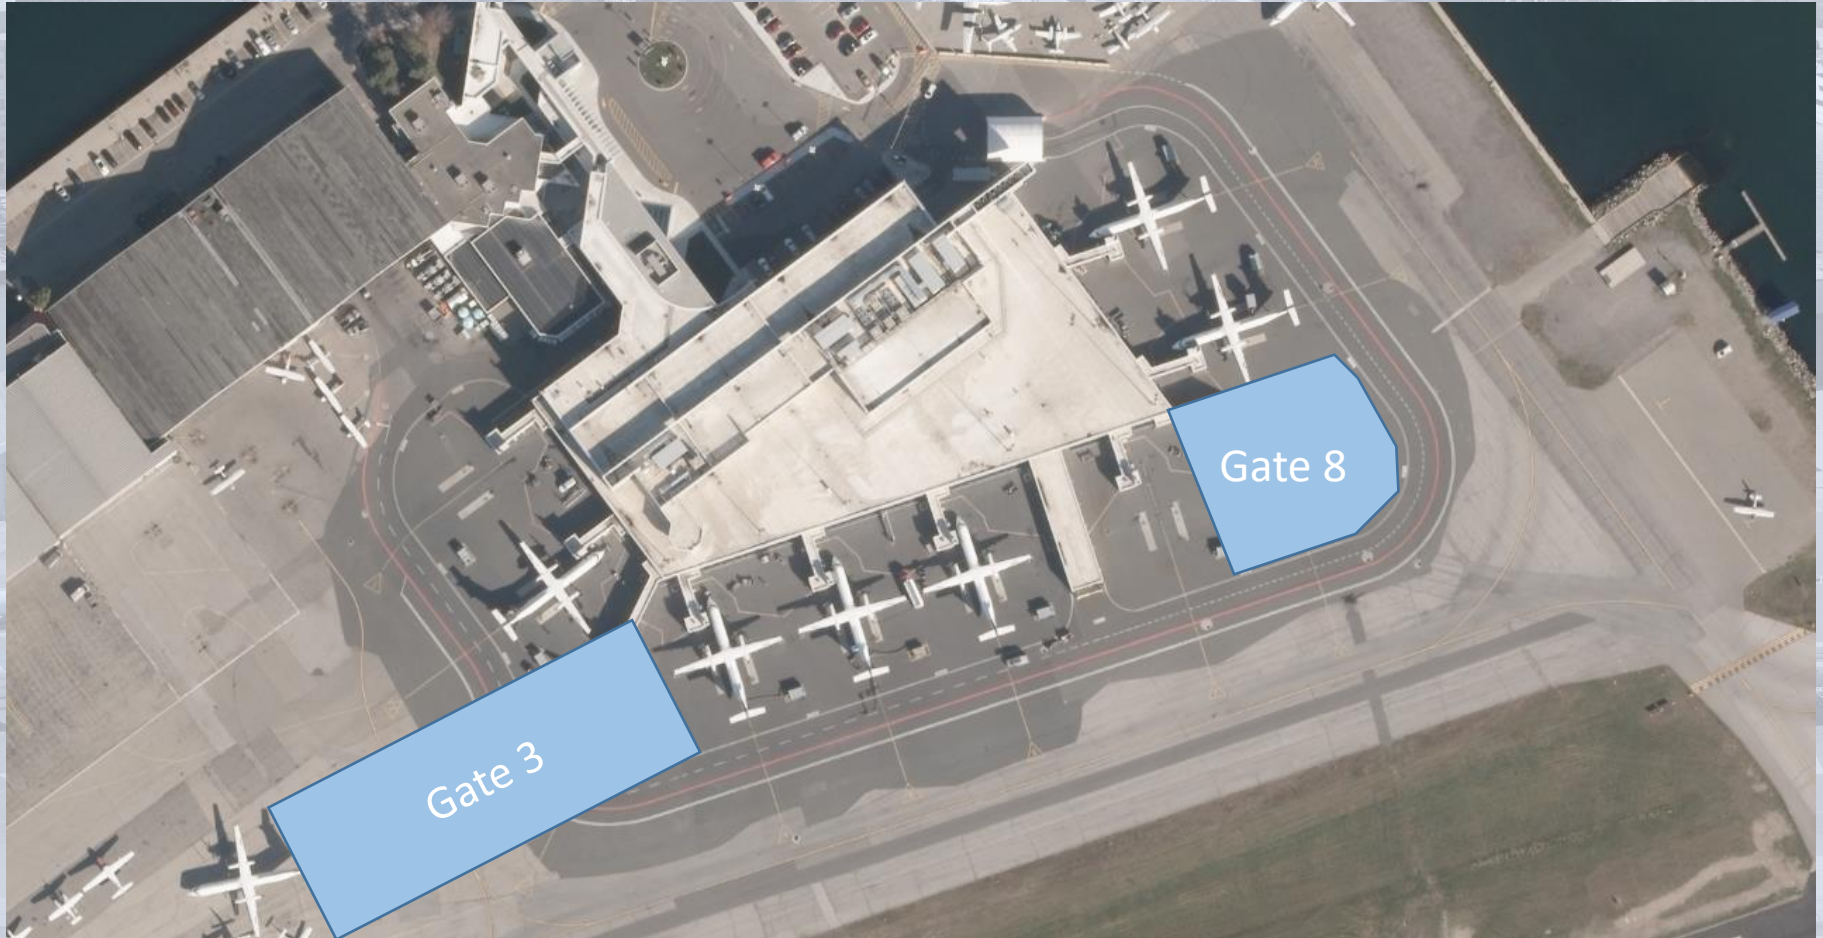

Module Temporary Gate in place

Interior of Module Temporary Gate

Upcoming Exterior Works Areas

February & March 2017

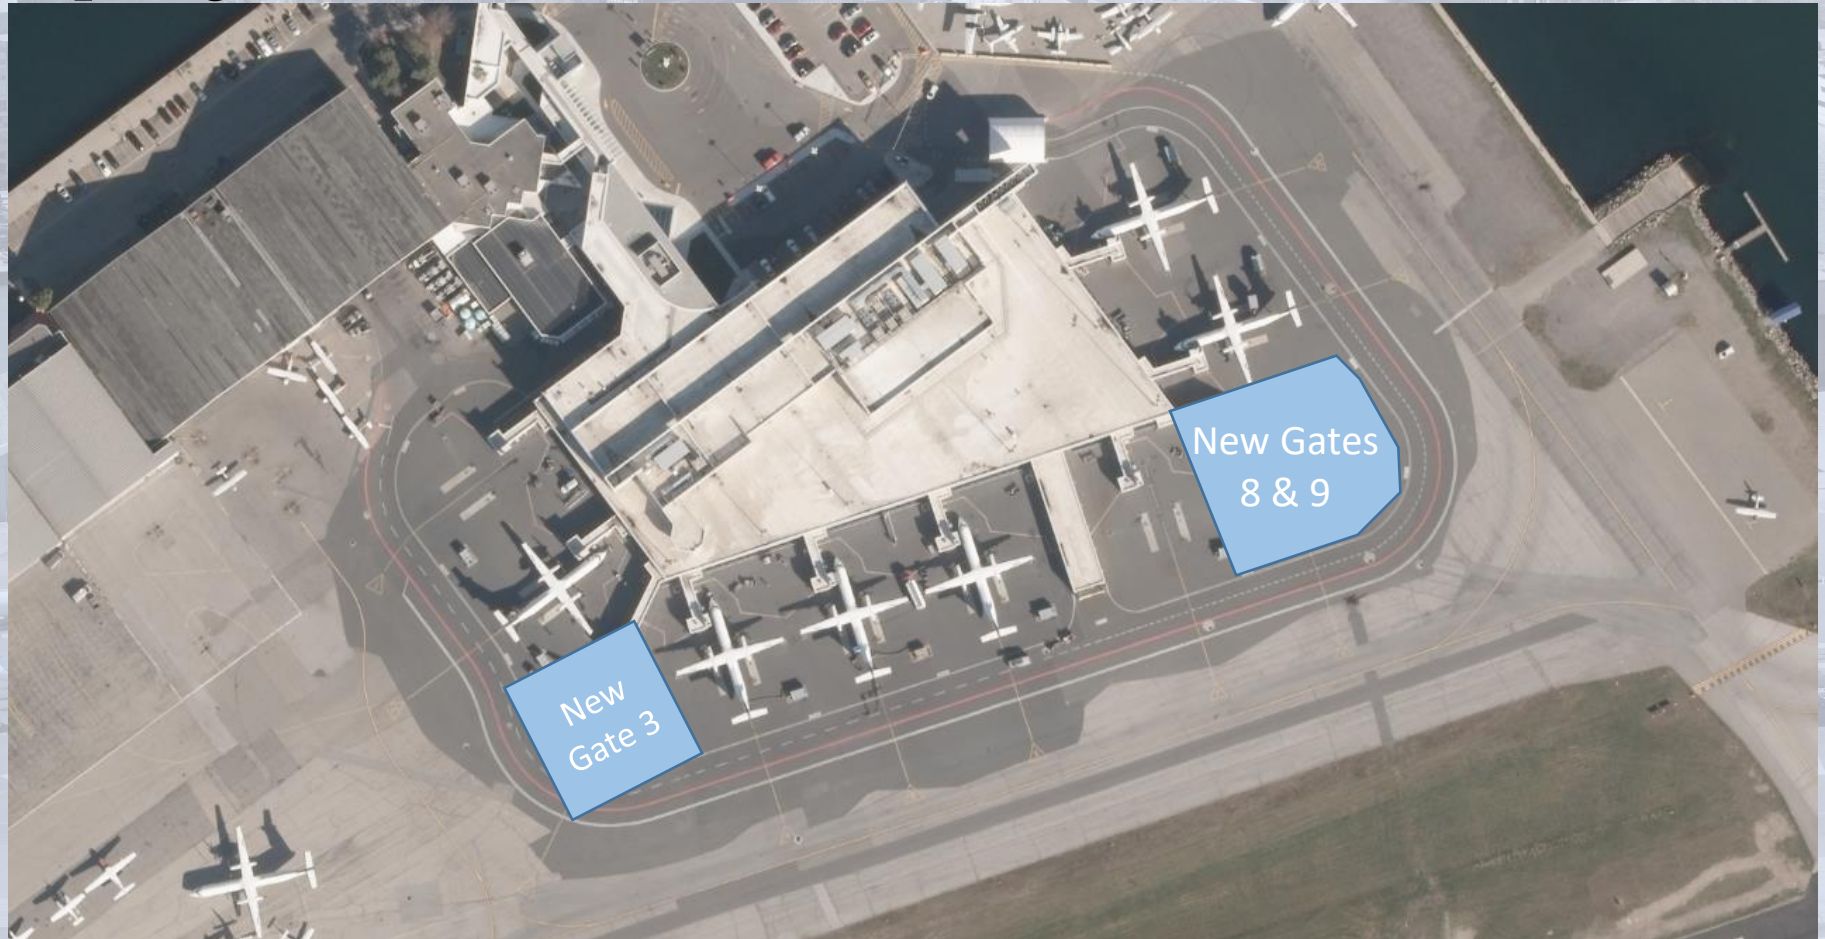

Upcoming Exterior Scope

- 2017
 - February
 - Installation and commissioning of temporary boarding gates 8A and 8B
 - Demolition of boarding gate 3
 - March
 - Site services work (water and sewer lines)
 - Installation and commissioning of temporary boarding gates 3A, B, & C

Final Exterior Works Areas

Spring – Summer 2017

Community Outreach

- Updates to be provided at quarterly Airport Community Liaison Committee
- Direct briefings are available to both the York Quay Neighbourhood Association and Bathurst Quay Neighbourhood Association
- Outreach via email to CLC for notification on any material changes that may have impact to the community.
- For any questions/concerns on this project contact Gary Colwell at BBTCA's Noise Management Office at 416-203-8490 or online at <https://www.porttoronto.com/porttoronto/contact-us/submit-a-noise-complaint.aspx>
